

# Procedural cloud shader

## Requirement specification

#### Project 2

The goal of this project is to research and implement a procedural, volumetric cloud shader. The following document reveals the process of creating such a shader from both a technical and mathematical perspective, considering different algorithms for techniques like noise generation and raymarching.

Field of Studies: BSc in Computer Science

Specialization: Computer perception and virtual reality

Author: Matthias Thomann Supervisor: Prof. Urs Künzler Date: February 29, 2020
