

Procedural cloud shader

Requirement specification

Project 2

The goal of this project is to research and implement a procedural, volumetric cloud shader. The following document reveals the process of creating such a shader from both a technical and mathematical perspective, considering different algorithms for techniques like noise generation and raymarching.

Field of Studies: BSc in Computer Science

Specialization: Computer perception and virtual reality

Author: Matthias Thomann Supervisor: Prof. Urs Künzler Date: February 29, 2020

1 General

1.1 Purpose

This document serves the purpose of defining and clarifying the goals, which the project 'Procedural cloud shader' is supposed to achieve. Furthermore, the requirement specification allows for a more accurate evaluation of the achievement of objectives and of the result itself.
